

Domain Names

What is a domain name?

A domain name is what someone enters in to a browser in order to get to your site. It is also referred to as the URL of your site. An example would be dailyinnovations.com.

You can think of a domain name as the address of your house and the property your house (website) sits on is the site hosting.

Why do I need a domain name?

Without a domain name no one can get to your site!

How much does Daily Innovations charge for domain names?

Domain names are priced depending on the extension (also known as the Top Level Domain or TLD) that you want for your site (.com, .org, .tv, .info, etc).

.com Domains

Contract Length	Cost	Cost / Year	1 Year	\$16.00	\$16.00	5 Years	\$75.00	\$15.00	10 Years	\$140.00	\$14.00
-----------------	------	-------------	--------	---------	---------	---------	---------	---------	----------	----------	---------

.org Domains

Contract Length	Cost	Cost / Year	1 Year	\$20.00	\$20.00	5 Years	\$95.00	\$19.00	10 Years	\$180.00	\$18.00
-----------------	------	-------------	--------	---------	---------	---------	---------	---------	----------	----------	---------

All prices subject to change without notice. Prices for other domains can be found [here](#). What is a Domain Name Locator service and does Daily Innovations offer this? A Domain Name Locator service simply helps the client to find an appropriate and available domain name. It is typically desired in cases where the domain name originally wanted is already taken, or the client just isn't sure how to go about finding a proper domain name. Daily Innovations does offer this service for a fee of \$200.00. After speaking with you about any ideas or keywords that are important to you we will find up to 15 different domain names that are available and suitable. What if I already have a domain name?

If you already have a domain name we can transfer based on the pricing you see above. As a bonus for transferring you will get one year free in addition to whatever time you have left on your current domain name contract.

How long will it take for my domain name to be active?

New domain names are usually active and available within 24 - 48 hours after registration. For a domain name transfer it's a bit more complicated and usually takes 5 - 7 days. The reason for this is that the domain name must be released by the old domain name provider.
