

Site Hosting

What is site hosting?

Site hosting is a service that allows a client to either upload their own web pages to the Daily Innovations servers or edit their web pages directly in a browser. The web pages are then available for users on the Internet to view. Email addresses are also included in the site hosting service.

If you think of your domain name as the address of your house (website), site hosting is the property your house (website) sits on.

Why do I need site hosting?

Without site hosting you might have a domain name but your web page(s) still would not be accessible.

How much does Daily Innovations charge for site hosting?

We offer three payment plans for site hosting: semi-annually (every 6 months), annually, and biennially (every 2 years). We also offer discounted pricing for non-profit organizations. Contact us for more information!

Contract Length	Cost	Cost / Month	Semiannually \$90.00	\$15.00	Annually \$174.00	\$14.50	Biennially \$324.00	\$13.50
-----------------	------	--------------	----------------------	---------	-------------------	---------	---------------------	---------

What if I already have site hosting through another provider?

Depending on the type of site that you will have hosted with Daily Innovations you will have the option to move your current site yourself, recreate your site with Daily Innovations, or in most cases Daily Innovations can assist with moving/recreating your content for a nominal fee.
