

Custom Development

What types of custom development can Daily Innovations perform?

Daily Innovations can accomplish a number of desired client objectives through custom development. Here is a partial listing of the types of functionality that Daily Innovations can create for a client:

- Appointment Scheduling
- Customer Management
- Content Management - view case study
- eCommerce
- Custom reports
- Galleries (image / movies)
- Publishing site

For the most part, if a client has a need or vision, Daily Innovations can create a solution to match! One thing to note is that Daily Innovations does not do Flash development. For some of the reasons why you can check out the following article:

[Flash equals evil website design](#)

How much does custom development cost?

Custom development is billed at an hourly rate of between \$50.00/hr and \$75.00/hr depending on the type of work being done. The client, however, will get a fixed quote for the work to be done so they will always know exactly how much any particular piece of development will be prior to the work being started.
